'Extremes' for Sunday 1st August 1982

Highest maximum	: 26.7°C Coltishall (nr Norwich)
Lowest minimum	: 10.2°C Glenlivet (Grampian)
'Lowest grass minimum	: 7.8°C Glenlivet
Most rain (24 hours from 0900 h)	: 14.8 mm Mull of Galloway
Most sun	: 11.6 hr Worthing

SUMMARY OF BRITISH WEATHER

South Wales, the South Midlands and southern England were mostly dry but there were fog patches inland overnight and in the early morning and also some coastal fog. Most places had some sunshine. Many places in central southern and southeast England were very warm. One or two showers developed later. North Wales, the North Midlands, East Anglia, northern England, Northern Ireland, southern and western Scotland were mostly cloudy with outbreaks of rain, some of it heavy with a few thunderstorms. However during the day the rain tended to peter out and move away northwestwards and parts of North Wales, the North Midlands, central northern England and East Anglia then had some sunny intervals and became very warm. Northern and eastern Scotland were rather cloudy but dry and the central Highlands were again quite warm with some sunshine.

CORRECTION

31.7.82 Most Rain:

10.1 mm Mull of Galloway.

'Extremes' for Monday 2nd August 1982

Highest maximum	: 27.6°C Heathrow.
Lowest minimum	: 9.5°C Glenlivet.
Lowest grass minimum	: 4.6°C Lerwick.
Most rain (24 hours from 0900 h)	: 22mm Anvil Green (Kent)
Most sun	: 12.0hrs Hemsby

SUMMARY OF BRITISH WEATHER

Southern England, East Anglia, the Midlands and much of northern England were mostly dry but very misty at first with some thick fog in places and also some coastal fog. Most places were very warm and humid with some sunshine with the best of the sunshine in southeastern areas. A few isolated showers or thunderstorms occurred in the afternoon and evening chiefly in the South Midlands and central southern England.

Cumbria, Northumberland and Scotland were mostly cloudy with mist and coastal fog and also some occasional rain or drizzle chiefly near the east coast. In the Lake District, the Southern Uplands and western Scotland there was some thundery rain in places and a few thunderstorms. The central Highlands however were mainly dry with some sunny intervals.

Northern Ireland was dry with a few sunny intervals but also some early morning mist and coastal fog.

'Extremes' for TUESDAY 3RD AUGUST 1982

Highest maximum	: 29.5°C Marham
Lowest minimum	: 10.4°C Carrigans
Lowest grass minimum	: 7.3°C Carrigans
Most rain (24 hours from 0900 h)	: See Summary ⟶
Most sun	: 14.0hrs Lerwick

SUMMARY OF BRITISH WEATHER

Much of Britain had a dry, warm night, but in southeast England and also in parts of northern Britain there were thunderstorms. It was foggy in many places, especially in coastal districts. There was a little rain in Scotland in the morning and a shower or two in the evening but much of the day was dry and sunny, over Scotland, Northern Ireland and Wales and most places were very warm, though some coasts were cooler, with fog in places. In England many places had a dry, fairly sunny and hot day, but late in the day there were thunderstorms in parts of East Anglia, the Midlands and southern England. Some of the thunderstorms were violent with torrential rain causing local flooding; reports have been received of one inch in twenty minutes at Ely (Cambs) and of two inches in forty minutes at Hayes (Middx).
Lerwick had its warmest August day on record (60 years) with a temperature of 20.8°C.

'Extremes' for Wednesday 4th August 1982

Highest maximum	: 28.7°C Kinloss
Lowest minimum	: 7.2°C Tummel Bridge
Lowest grass minimum	: 5.5°C Wick, Kinloss
Most rain (24 hours from 0900 h)	: 123.6mm Ely (Cambs) (Between app 1800 & 2100; Anglia Water Authority station.)
Most sun: 13.7hrs Fair Isle.	

SUMMARY OF BRITISH WEATHER

Many parts of Scotland had a sunny, hot day, but it was misty and damp in the east early and late, and parts of the Western Isles were cloudier with a few thundery showers in the morning. Most of Northern Ireland, Wales and southern England had a cloudy day, and there was extensive fog at first. Thundery showers affected parts of North Wales in the morning, and rain spread across southwestern districts during the late afternoon and evening. Over central, eastern and northern England it was very warm and humid with some sunshine. There were some thunderstorms at first in the north Midlands, and more thunderstorms developed during the afternoon, becoming widespread in the evening, but gradually clearing from the south. Many of the storms were severe, and a man was killed by lightning on Hampstead Heath.

Additional report

3.8.82; 75mm of rain in 30 minutes at Great Chishill nr Royston (Cambs/Herts/Essex border).

SUMMARY OF BRITISH WEATHER

Overnight it was cloudy in many regions and there was patchy fog, especially in the north and east of England and around southwestern coasts. Although some parts were predominantly dry, most had at least some light rain or drizzle at times and in places there were outbreaks of heavy rain and thunderstorms. In northern England isolated thunderstorms died out in the early hours but in central and eastern counties more thunderstorms developed during the afternoon and evening with heavy downpours, similarly in East Wales, central and northern Scotland there were several thunderstorms during the evening. In the Shetlands it was dry with some sunshine. The driest and brightest parts were in northwest England and in parts of southern Scotland. In parts of Scotland it was a very hot day. Lerwick had its warmest day in August with a temperature of 21.5°C.

'Extremes' for Thursday 5th August 1982

Highest maximum	: 28.0°C Dumfries.
Lowest minimum	: 10.1°C Glenlivet.
Lowest grass minimum	: 6.8°C Wick.
Most rain (24 hours from 0900 h)	: 71mm reported from Valindre (Nr Talgarth, Brecon, Hay on Wye).
Most sun	: 9.6 hrs Aspatria.

Lowest minimum	: 11.7°C Lerwick
Lowest grass minimum	: 8.4°C Farnborough (Hants)
Most rain (24 hours from 0900 h)	: 66.1mm Lossiemouth (Moray Firth)
Most sun	: 8.6hrs Marham

SUMMARY OF BRITISH WEATHER

Over most of East Anglia and southeastern England it was dry, and after a foggy start in places there were sunny spells. In Southeast Wales and many southern counties of England, the Midlands and Lincolnshire there were outbreaks of heavy rain and some thunderstorms overnight. The day was mostly dull, with some rain or drizzle and in central southern England and Lincolnshire there were isolated thunderstorms again in the late afternoon and evening. Over northern England, Wales, Northern Ireland and southeast Scotland there was drizzle in places overnight and near North Sea coasts it stayed damp and misty; elsewhere the day was mainly dry, with only isolated showers. In remaining regions of Scotland it was cloudy with outbreaks of heavy rain and thunderstorms. Thunderstorms were most frequent in the Grampian and S. Highland region, whilst there were several hours of heavy rain later in the Moray Firth area. Northern coasts were foggy.

SUMMARY OF BRITISH WEATHER

Northern Scotland was overcast with periods of heavy rain, and fog on hills and coasts. The rain cleared from the west by afternoon, followed by drier weather. Northern Ireland and the Isle of Man had a dry day with sunny intervals. Southern Scotland, Wales and southwest England were dry, with sunny periods; it became very warm in southeast Scotland. Northern, central and eastern areas of England were mostly cloudy, with drizzle in places, but by evening the cloud was confined to eastern coastal counties. One or two heavy showers broke out in northeast England in the afternoon.

SUMMARY OF BRITISH WEATHER

Scotland started the day overcast with some rain and fresh to strong winds, but during the morning clearer weather, with a few showers and a fresh northwesterly wind moved from the west, reaching most of Scotland by mid-afternoon. Northern Ireland started dull with rain and drizzle, but the weather became clearer and showery around midday. There was some sunshine during the afternoon. Northern England and Wales were rather cloudy with a little rain, and patchy fog on western coasts. The weather cleared during the evening. The southwest of England and the Midlands were rather cloudy with occasional light drizzle, and fog on the coasts of the southwest. Southern and eastern counties of England were mostly dry with some sunshine especially in the southeast and it was very warm in places.

SUMMARY OF BRITISH WEATHER

Apart from a little rain or drizzle in parts of southern England and also a few showers in northern and western Scotland, most areas were dry overnight with clear intervals. Fog affected the Channel Islands. During the day many southern and eastern areas of England were dry, warm and quite sunny. Thickening cloud and some mainly light rain and drizzle reached Wales and northwest England around late morning and spread to southwest and central southern England, The Midlands and Lincolnshire by evening followed in north-western parts by dry and clearer weather. Northern England, Northern Ireland, southern and eastern Scotland were mostly dry with sunny intervals. Northern and western Scotland had sunny intervals and showers, some heavy and blustery with strong winds. Fog affected parts of the Bristol Channel. In the evening fog returned to the Channel Islands.

SUMMARY OF BRITISH WEATHER

Many areas were dry and clear overnight but in southern parts of England and Wales there was some mostly light rain or drizzle and in Northern Ireland and northern and western Scotland some showers. During the day most parts of England and Wales were dry and fairly sunny and some southeastern areas of England were quite warm. However some southwestern and southern coasts were misty with patchy fog and drizzle in places and during the evening this more cloudy weather with drizzle here and there extended to most of Wales and southwest England. Northern Ireland and Scotland had sunny intervals and showers, the showers most frequent in the north and west with strong westsouthwesterly winds in places. Northern Ireland and southwest Scotland were mostly cloudy by late evening.

SUMMARY OF BRITISH WEATHER

After a clear start in central and eastern areas of England and in the north and east of Scotland it became generally cloudy with some occasional drizzle in parts of southwest England, West Wales and some outbreaks of rain in northern England, Northern Ireland and the south and west of Scotland. Patchy sea fog affected parts of southern England. During the day the cloud broke up over much of England, East Wales and eastern Scotland to make it quite sunny and warm. In West Cornwall, West Wales, Cumbria, Northern Ireland and the north and west of Scotland despite some sunny intervals it remained generally rather cloudy with some occasional rain, particularly during the morning, with some bursts of moderate rain in the Isle of Man, Cumbria and southwest Scotland and there were patches of fog on the coast. Near exposed coasts of western Scotland south to southwesterly winds became strong to gale force during the evening.

Most rain (24 hours from 0900 h)	: 61.5mm Cwmbargoed (Mid-Glamorgan)
Most sun	: 10.6hrs Shawbury

SUMMARY OF BRITISH WEATHER

Overnight there were showers in the north and west of Scotland but after some rain early in the night, Northern Ireland and the south and east of Scotland were mainly dry. Over England and Wales cloud and some outbreaks of rain, especially on western hills, spread eastward to reach the southeast by morning. After early showers and isolated thunder in East Anglia and the southeast it became mainly dry with a good deal of sunshine and very warm in the southeast but elsewhere it was cooler with temperatures near normal. Patchy cloud brought some light isolated showers to some western places. Scotland and Northern Ireland had a much cooler day with some heavy showers, particularly in northern Scotland but with still a fair amount of sunshine especially in Northern Ireland and southern Scotland. Strong to gale force west to southwesterly winds affected northern and western Scotland. The highest gust reported was 64Kts at Sule Skerry.

SUMMARY OF BRITISH WEATHER

In Scotland there were sunny periods and scattered showers. In Northern Ireland there was a period of rain overnight and a mixture of sunshine and showers during the day. In England and Wales outbreaks of rain spread from the west to many regions overnight, but much of southern England remained dry. The rain was heavy in places, especially in South Wales. During the day, although it was dry at first in southeastern England, there was rain at times in all parts. There were some heavy bursts of rain, and also thunderstorms especially in eastern England in the afternoon. Brighter skies spread from the west to most places during the afternoon and in the extreme southeast clear skies arrived towards dusk, but in the Channel Islands rain persisted into the evening. In southern Britain southwesterly winds were strong with gales in exposed places for a time. It was mostly rather cool.

SUMMARY OF BRITISH WEATHER

Overnight it was dry with clear skies almost everywhere but in Scotland there were some showers chiefly in the north and west. It was a cold night, with a very slight ground frost in places. During the day in Scotland there were sunny intervals and scattered mostly light showers. In Northern Ireland, northern England and North Wales, it was a dry mainly sunny day but in North Wales there was rain in places during the evening. In the Midlands, East Anglia, southeast and central southern England, the morning was sunny but high cloud gradually thickened during the afternoon and outbreaks of rain reached southern counties by early evening and the rain spread to most of the Midlands and East Anglia later. In southwestern counties of England and Wales and the Channel Islands after a bright start rain reached Cornwall and the Channel Islands before midday. By mid-afternoon there was rain some of it heavy and during the evening one or two thunderstorms.

SUMMARY OF BRITISH WEATHER

In Scotland the day started mostly dry and chilly with ground frost and mist in places, but rain spread into southeast Scotland for a while. There were sunny intervals and temperatures close to normal. An area of showery rain with strengthening southerly winds moved into western Scotland in the late afternoon and evening. Northern Ireland was rather cloudy with scattered showers. Eastern and northern parts of England had a period of rain, occasionally heavy, at first and scattered showers later with a few thunderstorms in East Anglia. There were sunny periods, and it was quite warm. Wales and southern and western parts of England, after overnight rain had cleared, had a breezy day with sunny spells but scattered showers as well.

SUMMARY OF BRITISH WEATHER

In Scotland there was a period of rain during the early part of the day, followed by showers, which were frequent, heavy and accompanied by hail and thunder. The wind was strong to gale force, mostly south-westerly. Northern Ireland had fresh to strong south-westerly winds and showers, but there were good sunny periods. North Wales and northern England had a period of heavy rain during the middle of the day, followed by clearer showery weather. South Wales and the southern half of England had a showery day, the showers occasionally heavy. The southwesterly wind was strong at times on western and southern coasts. In southern and eastern areas of England the temperature was close to the normal, all other areas were rather cool.

SUMMARY OF BRITISH WEATHER

Over much of the Midlands, Lincolnshire, East Anglia, southern England and Southeast Wales it was predominantly dry with clear skies at times but during the afternoon and evening, it was mainly cloudy with rain in places, chiefly in the North Midlands and eastern England. In North and West Wales, northern England, Northern Ireland and Scotland there were showery outbreaks of rain during the night and early part of the day, but some clear or sunny intervals too. Later in the day more persistent rain spread from the west to reach southern Scotland and northeast England in the evening. In northeast Scotland however it was mainly dry with a good deal of sunshine. Southwesterly winds became strong on southern and western coasts of England and Wales with gales in exposed places during the evening. It was mostly rather cool.

'Extremes' for TUESDAY 17TH AUGUST 1982

'Extremes' for WEDNESDAY 18TH AUGUST 1982

Highest maximum	: 22.4°C Coltishall
Lowest minimum	: 7.7°C Aviemore
Lowest grass minimum	: 6.5°C Stornoway
Most rain (24 hours from 0900 h)	: 41.5mm Collafirth Hill (Shetland)
Most sun	: 11.2hrs Benbecula

SUMMARY OF BRITISH WEATHER

Overnight it was cloudy with rain or drizzle in most of England and Wales. In Scotland there was also some rain, mainly in central, eastern and southern areas, heavy at times. Northern Ireland had showers. During the morning brighter showery weather with some sunshine spread quickly east and south across Scotland, Wales, northern and central England. In southern England and East Anglia there were periods of heavy rain before brighter mainly dry weather spread from the west during the afternoon to reach east Kent by early evening. The Shetlands had rain for most of the day. In the evening much of Scotland and Northern Ireland had showers but in many areas of England and Wales it was mainly dry apart from light showers in the Midlands and northern England. The rain in Shetlands continued throughout the evening. Winds reached strong to gale force along the south coast until evening.

'Extremes' for THURSDAY 19TH AUGUST 1982

Highest maximum	: 20°C Several places in SE England
Lowest minimum	: 5.4°C Shawbury
Lowest grass minimum	: 0.0°C Exton (Somerset)
Most rain (24 hours from 0900 h)	: 41.0mm Enley Moor
Most sun	: 11.9hrs Manston

SUMMARY OF BRITISH WEATHER

England and Wales were mainly dry and clear with only a few isolated showers on western coasts but Scotland and Northern Ireland had scattered showers. In Shetland it rained all night. It was generally a much cooler night. In the early morning showers soon became fairly widespread along western coasts of England and Wales and spread inland to reach eastern counties by afternoon. At first the showers were mainly light but became heavier during the afternoon with hail and thunder in North Wales, northern England and the Midlands by evening. Over Scotland and Northern Ireland showers became more widespread during the morning, some heavy with hail and thunder, especially in Northern Ireland and south-west Scotland. Despite the showers most places had some sunshine and many southern coastal resorts had a sunny day but in Shetland it rained all day. It was rather a cool day with sharp falls of temperature in the showers.

SUMMARY OF BRITISH WEATHER

Overnight most of England and Wales were dry and mainly clear with only a few scattered showers, chiefly over northern and southwestern England. Over Northern Ireland and Scotland there were clear periods but showers were more widespread and cloudy weather with rain moved south as far as central Scotland by the morning. During the morning the rain continued southwards over Scotland and it was a cloudy, cool day in almost all northern regions with periods of rain or showers. The cloud and rain then turned more to the southeast over Cumbria and northeast England in the afternoon to reach East Anglia by evening. Over the rest of England and Wales showers were few and far between and there were sunny periods, especially in the south. It was quite windy generally, with gales in some of the more exposed northern areas.

SUMMARY OF BRITISH WEATHER

Most areas of the British Isles were dry overnight but there was some rain and drizzle in northeast Scotland. However, some rain reached Northern Ireland and the Western Isles of Scotland soon after dawn and this rain spread eastwards during the day reaching most eastern parts of England and Scotland by mid-afternoon. Many areas became dry for a time but further rain spread into Northern Ireland and western Scotland during the evening with clearer, showery weather reaching the extreme west before midnight. Much of Wales, the Midlands, East Anglia and southern England had a dry day with just a little rain chiefly in the more northern and western areas. Central and eastern counties of England had a sunny morning and some south eastern areas had quite a sunny day but most places were cloudy during the late afternoon and evening. It was mostly quite cool, except in parts of the south.

SUMMARY OF BRITISH WEATHER

An area of rain crossed Scotland and Northern Ireland before dawn, followed by showery weather. Some of the showers were heavy and prolonged during the day, but there were also sunny spells. The Northern Isles were slow to clear and Shetland remained damp and misty throughout. Wales and northern England were overcast during the morning with a period of rain, heavy at times followed during the afternoon by brighter weather with a few showers. Southern England, the Midlands and East Anglia were rather cloudy with showers, but there was a period of heavier rain in the North Midlands and East Anglia during the late afternoon or evening. The Channel Islands were fairly sunny. Temperatures were near or below normal, and winds were strong on some exposed coasts.

SUMMARY OF BRITISH WEATHER

Overnight Scotland, Northern Ireland, northern England, Wales and most of southern England were mostly cloudy with scattered showers or periods of rain. Southeast England was generally dry and mostly clear except for parts of Kent where it was cloudy with some light rain or drizzle. During the day most areas were rather cloudy with sunny intervals and showers. During the afternoon thickening cloud reached Northern Ireland and western Scotland with rain in the evening. Over remaining areas the showers died out in most places by early evening. In the late evening rain reached the Isle of Man and North Wales. Temperatures were near or a little below normal.

SUMMARY OF BRITISH WEATHER

Many eastern and southern counties of England were dry overnight but rain occasionally heavy over Northern Ireland and western Scotland spread quickly eastwards reaching most of Scotland, northern England, Wales and the West Midlands by morning. The rain spread eastwards during the day although some parts of southern England were drier and brighter for a time. Brighter weather with blustery showers reached Northern Ireland around midday and many northern areas around mid-afternoon. This clearer weather reached most areas by evening but in East Anglia and southeast England where there was some rain and drizzle in the evening, the clearer weather didn't arrive until towards midnight. Most areas were cool and many northern and western parts of the British Isles were very windy with strong to gale force westerly winds in places.

SUMMARY OF BRITISH WEATHER

Cloud over East Anglia and southeast England cleared early in the night and most places were clear and dry with showers chiefly confined to the north and west of Scotland where winds reached severe gale force on exposed northern coasts. In Shetland it remained overcast with drizzle. During the day showers were frequent and heavy at times in Scotland and Northern Ireland, and parts of southwest Scotland, the southeast of Northern Ireland and northwest Cumbria had hail and thunder. There was also some sunshine, especially in eastern Scotland and the wind slowly moderated with Shetland turning showery by afternoon with some hail. Over England and Wales there were fewer showers and most of these were confined to the north and west and many places remained dry with sunny periods. During the evening showers continued but mainly in the north and west. Southeast England was dry. In the Channel Islands there was some light rain or drizzle.

SUMMARY OF BRITISH WEATHER

Many places had a mainly dry night with clear skies and in parts of southern England there was some fog but there were also some showers especially in northern and western districts with a thunderstorm in northwest England. During the day most places had some dry, sunny weather especially during the morning and some places had a dry, sunny day, but there were showers in many places. Some of them were heavy and in the afternoon and evening there were some thunderstorms and hail over England and Northern Ireland. In the early afternoon the Shatlands had some continuous rain. Fog developed in parts of southern Scotland by midnight. Over much of Britain temperatures were a few degrees below normal.

SUMMARY OF BRITISH WEATHER

There were showers in northern Scotland and the Northern Isles throughout the day, sometimes penetrating into other areas of Scotland. Most of the showers were light, but hail was reported from Aberdeen during the afternoon. There were also sunny spells. In Northern Ireland, there were showers during the morning, but the afternoon was mostly dry and bright. In England and Wales, showers were scattered and mostly light but there were heavier showers with thunder near parts of the south coast during the first part of the morning. Most places had a fair amount of sunshine. After a cold night in places, the day was mostly rather cool, although temperatures reached the seasonal normal in the southeast.

SUMMARY OF BRITISH WEATHER

In parts of southwest England, South Wales, the Midlands and in large areas of northern Britain and Ireland the day started rather cold with a touch of frost and a few short-lived fog patches. The northern half of Scotland had scattered showers, mostly light. During the day, the showers died out in northwest Scotland, and by evening the northeast was dry. There were sunny intervals during the day, but cloud thickened during the late afternoon, and rain and freshening winds reached northwest Scotland during the evening. Northern Ireland, southern Scotland and northern England had a dry day with good sunny periods, but it became rather cloudy by evening. Wales and central and southern areas of England were dry, with long sunny periods. Over most of the country, maximum temperatures were close to normal.

SUMMARY OF BRITISH WEATHER

Much of England and Wales had a clear cool night with only a few patches of fog in the south but cloudy weather reached the north and west before morning with rain in Cumbria and Gwynedd. Scotland and Northern Ireland were rather cloudy and rain, heavy in places, spread quickly to all parts followed by clearer showery weather in the west. During the day Northern Ireland and Scotland were showery, rain clearing southern Scotland by midday. The showers became quite frequent and sometimes heavy and there were only a few sunny intervals chiefly in the east and south. During the morning Wales and most of the north of England, Devon and Cornwall became cloudy and very windy but with a narrowing and weakening band of rain and apart from in Cumbria it was mainly light. Lincolnshire, the Midlands and the rest of SW England became cloudy in the afternoon with a little rain in places but the remaining southeast corner had a dry, sunny day with the cloud and rain holding off until after dusk. Temperatures were mostly well up to normal.

SUMMARY OF BRITISH WEATHER

The weather was generally showery, with some sunshine, chiefly in the south. Strong northwesterly winds spread slowly southeast across the country during the day bringing overcast skies and a sharp drop in temperature, so that many northern and western areas became very cool. This change did not reach the southeast until the evening, and here daytime temperatures were well up to normal. Just before the arrival of the cloudy, cool weather there were some heavy showers with local thunder, these being most marked in northeast England.

SUMMARY OF BRITISH WEATHER

Much of Britain was mainly dry overnight, but in northeast Scotland there was some occasional rain and drizzle and in parts of England an area of more significant rain and drizzle moved southeastwards, across the East Midlands East Anglia and the southeast of England. This finally cleared the east coast of Kent a few hours after sunrise. In parts of southern Scotland it was quite a chilly night. There were a few light showers in the morning over England, and in the afternoon and evening there was some rain, drizzle and fog in the Isles of Scilly, Cornwall and Dyfed but most places in England had a dry day with at least a little sunshine. In Wales too it was dry with a little sunshine here and there. In Scotland and Northern Ireland it was mainly cloudy with a little rain and drizzle at times. Temperatures in most places were below normal.
